Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	<b>Application No.</b> 10/720,131	<b>Applicant(s)</b> ASAINÉ, MASAYA	
	<b>Examiner</b> Margaret G. Moore	<b>Art Unit</b> 1712	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1 to 4 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1 to 4 is/are rejected.

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1 to 4 are rejected under 35 U.S.C. 102(e) as being anticipated by Yamada et al.

Yamada et al. teach heat conductive silicone compositions. See components (A), (C), (D) and (E) on column 2 which correspond to claimed components (a), (c), (b) and (e), respectively. The amounts of (A) and (E) correspond to the amounts of (a) and (d) claimed. The Examiner notes that the presence of the compound (B) is embraced by the claims due to the language "comprising".

Particular attention is drawn to the examples and Table 2. In these examples the total number of Si-H groups in (B) and (C) is used to determine the ratio of Si-H groups to Si-Vi groups. However Table 2 also shows the number of Si-H groups from (B) compared to the number of Si-H groups from (C) and from this one can determine that the total number of Si-H groups from (C) is sufficient to meet the .1 to 5 moles of Si-H group requirement claimed. For instance in Example 6, there is a 4:1 ratio of Si-H groups from (C) to Si-H groups from (B). This means that 4/5 of all Si-H groups come from (C). Thus of the 1.4 Si-H groups per Si-Vi groups, 1.12 Si-H groups from (C) are present for each Si-Vi group. This falls within the breadth of the range claimed for component (c). As such this example meets instant claim 1.

The thermally conductive fillers used in the examples are Al powder and ZnO powder, meeting claim 2. Column 7, lines 25 and on, teaches forming a sheet from the silicone composition and applying it to a heat dissipator, meeting instant claims 3 and 4.
